

PoW 25: A Visible Graph

1. Graph $y = (x - 100)^2 - 200$ and label its vertex on the axes provided.

1. Practice
2. Work Backwards
3. Apply

2. Use [Desmos](#) to graph $y = a(x - 100)^2 - 200$. On the same graph above, use a dashed line to draw the graph when $a = 0.5$ and $a = 3$. (You may need to zoom out on Desmos).

3. Using the same graph as in part 2, click the home  button to return the screen to a smaller window. Find a value for a so that you can see some of the graph on your screen without changing your window from the home window.

Write one or two sentences about how you found a .

This PoW is unusual, because you answer Parts 1 and 2 on this sheet. For Part 3, you may answer it on the back or on a separate sheet.
